

THE CHECK UP

Team Updates:

We are excited to welcome Dr Li-Hsing, who joined our team in January.

Dr Li-Hsing Chou

Dr Li-Hsing completed his medical degree at the Auckland University. His practice emphasises patient-centred and evidence-based care, with a focus on lifestyle and preventative medicine. Outside of work, Li-Hsing trains in the gym and also enjoys swimming and football. He is fluent in both English and Mandarin.

You are a winner!

A big thank you to the Kinge family for sharing your feedback in a Google review! We appreciate your support and hope you enjoy your hamper—congratulations!

Introducing our Nurse Practitioners

Nurse practitioners have advanced education, clinical training, demonstrated competence and authority to practice in primary care in an extended scope.

They can provide healthcare services, diagnose and manage common and complex health conditions. Their scope of practice is similar to our GP's with the added benefit of a nursing background.

Nurse practitioners can

- + Examine, diagnose, treat, and monitor your health
- + Order tests and x-rays
- + Address acute & chronic health issues
- + Refer to specialists and hospitals
